1. Introduction

The Clean Sport Commitment Pledge is one of the key deliverables of EPCS-TE and represents a formal expression of shared intent by the project consortium, adopted at the End-of-Project Conference held on 17 April 2026.

The Pledge sets out the concrete commitments of the EPCS-TE partners to sustain and extend their collaborative work in clean sport education beyond the lifetime of the project. It is designed not only as a statement of accountability for the consortium itself, but also as an open invitation and a practical model for other tertiary education institutions and NADOs across Europe and beyond to join this growing community of practice.

The key objective of the Pledge is to facilitate NADO-university partnerships, based on the empirical findings of project EPCS-TE and consistent with: (a) the Council of Europe Recommendation Rec(2016)2 on Anti-Doping Education Guidelines for Tertiary Education Institutions, (b) the World Anti-Doping Agency (WADA) 2027 International Standard for Education (ISE), and (c) UNESCO Resolution 10CP/14 – Enhancement of Education Capacity and Academic Research in the Fight against Doping (2025).

The Pledge is presented below in English, and in Appendices 1–4 in Greek, Italian, Polish, and Portuguese, reflecting the languages of the project's partner countries.

2. EPCS-TE Clean Sport Commitment Pledge

The consortium of the European Partnership for Clean Sport in tertiary Education (EPCS-TE) Project, gathered online at the End-of-Project Conference on 17 April 2026, and building on the findings and outcomes of the project, pledge to:

- Further develop structured and formalised collaboration between National Anti-Doping Organisations and tertiary education institutions, including joint planning, co-design, and delivery of clean sport education activities.
- Establish clear coordination mechanisms within partnerships, including, regular engagement, shared planning of activities and designated contact points.
- Support the integration of clean sport education within tertiary education programmes and professional development pathways.
- Support the design and delivery of anti-doping education courses, modules, and learning activities within tertiary education that foster values, critical thinking, and responsible decision-making.
- Encourage the exchange of knowledge and research between academia and anti-doping organisations, contributing to more evidence-based and effective education approaches.
- Promote the use of implementation plans, monitoring, and evaluation mechanisms to assess the impact of collaborative activities and ensure continuous improvement.
- Sustain and further develop this collaboration beyond the project, working together towards long-term impact within tertiary education and the broader clean sport environment.

Because the protection and promotion of clean sport is a shared responsibility, one that requires ongoing cooperation, trust, and long-term commitment from all stakeholders involved.
